RELEVANT EXPERIENCE / PROJECTS

Fortress of Fandom
https://github.com/ThomasNguyen546/fortress-of-fandom | https://immense-mesa-76865.herokuapp.com/
This application was born out of a podcast that one of my teammates had created. Fortress of Fandom is a podcast hub where users can follow along with podcast episodes, comment on weekly videos, and a place to shop for available merchandise.
Role: Used React to create a template for the website. Created multiple pages where users can interact with podcast audio pulled from Spotify. Styled the pages to flow with theme, and create smooth user experience.
Utilized: React, JavaScript, HTML, Node.js, Express, MongoDB, Apollo, Heroku

Holiday Planner
https://github.com/ThomasNguyen546/holiday-planner | https://desolate-inlet-16467.herokuapp.com/
Holiday Planner is an application designed to make planning the holidays easier for you. The To-Do list helps to track all necessary tasks in one organized list, while the recipe finder allows you to save all your favorite recipes in one place for easy access.
Role: Created HTML handlebars styled with CSS and Bootstrap. Made a persistent user favorites functionality to save and to preview recipes. Helped style the application and its responsive properties.
Utilized: JavaScript, CSS, HTML, Bootstrap, jQuery, Express.js, MySQL, Handlebars.js

Recipe Roundup
https://github.com/ThomasNguyen546/Recipe-Finder | https://thomasnguyen546.github.io/Recipe-Finder/

Recipe Roundup allows users to search up recipes using the Edamam API, and save your favorite recipes to view at a later date. The application allows you to input a zip code to find local stores nearby for ingredients using the Google Places API.
Role: Created HTML pages styled with CSS and Bootstrap. Created homepage and recipe cards styled with bootstrap
Utilized: HTML, CSS, Bootstrap, Heroku, JavaScript
